

## **Welcome to Freedom at Depth Canada (FADC).**

With more than 15 years experience we are Canada's premier scuba diving training organization for people with disabilities.

### **Our mission is simple:**

*To train people with disabilities to the point where they have the ability and the confidence to participate in scuba diving, a sport many people, including many people with disabilities, think out of reach.*

Scuba diving is an exhilarating experience for everyone.

For people with disabilities it has an added benefit – the sense of freedom and independence that you feel underwater.

### **Completing FADC's certification course in scuba diving;**

The HSA Open water course provides people with disabilities the credentials they need to be able to scuba dive around the world.

This training is specifically designed to adapt to an individual's requirement to ensure his/her safety and that of his dive buddy (buddies).
